

Alok Sharma, MP for Reading West

8th April 2020

Dear Constituents,

Thank you for contacting me about Motor Neurone Disease (MND) and Coronavirus.

In addition to the 1.5 million people identified in England with conditions already centrally identified, GPs are currently identifying other patients who are clinically extremely vulnerable. These patients will be contacted directly and will be advised to shield.

This means that if someone with MND is identified by a GP to be clinically extremely vulnerable they will be added to the list, and will be able to access the cross-Government support package.

If you believe that you should be included in the extremely vulnerable group, you are advised to contact your GP.

Thank you again for contacting me.

Yours sincerely,

Alok Sharma MP
